Lithium Projects

Clayton Valley

- Largest mining program in the US with 49% of the Bureau of Land Management's active mining claims
- Our claims in Clayton Valley are bordering the Silver Peak Lithium Project of Albemarle Corporation (NYSE: ALB), home to the only producing lithium mine in North America.
- The property has strong potential to host Lithium brine deposits in favorable geologic horizons within the basin fill. Another possible target is lithium enriched clay within the fill package and potentially in previous high stands of the playa.

Texas Spring

- The Texas Spring Property encompasses a series of mineral lode claims situated in Elko County, Nevada. Located in the Granite Range southeast of Jackpot, Nevada, it is approximately 73 km north-northeast of Wells, Nevada. The primary focus of exploration on this property is to uncover a lithium clay deposit found within volcanic tuff and tuffaceous sediments of the Humbolt Formation.
- Adjacent to the southern boundary of the Nevada North Lithium
 Project, which is owned by Surge Battery Metals Inc. ("Surge") (TSXV:
 NILI, OTC: NILIF) and comprises 303 mineral claims, lies the Texas
 Spring Property. Surge's initial drilling efforts have successfully
 identified lithium-rich clay deposits with significant mineralization. In the
 2022 drilling program, the average lithium content within all near-surface clay
 zones intersected, using a 1000 ppm cut-off, was recorded at 3254 ppm (as
 announced in the press release on March 29, 2023).

NEVADA

Copper Projects

British Columbia Copper Property

- The Grid Copper Project consists of 17 claims comprising of 27,525.24 hectares in the Omineca Mining Division of north-central British Colombia, approximately 150km north of Ft. St. James. The claims are not subject to any royalty terms, back-in rights, payments or any other agreements and encumbrances.
- The property is road and helicopter accessible from Ft. St. James via a network of province-maintained paved roads and forestry-maintained gravel roads. The Canadian National Railway company owns an inactive railway line that passes a short distance from the property.
